Professional Experience

Cyber Security Business Developer | DC-Tech USA | Feb 2020 - Dec 2020 | Herndon, VA

- Researched and documented online cyber security threats to company websites and formulated solutions to help our clients fight against data breaches, which costs companies on average over 8 million dollars.
- Developed and designed a company website for the cyber security division to help with online exposure.
- Managed Business-to-Business relationships between DC-Tech USA and their clientele.

Software Developer Intern | Radical Company | Jun 2017 - July 2017 | London, UK

- Developed an application using Swift programming which was first presented as an idea by the CEO of Radical.
- Managed a team of interns and led a project which further advanced the company's insight on a potential target market.
- Trained in JavaScript to further my understanding of front end software engineering.

Product Manager Intern | Aol, Inc. | Feb 2016 - Jun 2016 | Dulles, VA

- Managed a website for our team products on the Wix Platform.
- Created user stories and other product documentation to direct product development.
- Assessed market research and analysis on team products and competitors.
